Project Summary

Strategic planning of international cooperation, which includes the mobility of students and teachers, leads to the creation of a network of collaborators that contribute to achieving the mission and vision of the Technical School Slavonski Brod. The Strategy of internationalization of Technical School is aimed at improving the system of permanent professional development in vocational education and training, defined by the program of development of the vocational education and training system and also by the local needs of the economy, will be an imperative for all our teachers in order to be in continuous contact with the latest technologies from the sector. The basic idea of teacher mobility is to expand the experience of international cooperation and motivate learners to participate in mobility. Experiences from past projects implemented student mobility show that they significantly contribute to their motivation for the chosen profession, increasing their professional and personal competences and the quality of preparations for the global labor market.

In accordance with the mentioned project Kompas 3 has foreseen the following activities:
